

Waving not drowning? Environmental science in the sea of COVID-19

CHES Annual Conference | 18th May 2021 | Online

Call for abstracts

(Deadline 10:00 28th January)

Call for presentation proposals for CHES Conference 2021

This year's CHES Conference will focus on the impacts of the ongoing pandemic on the design, delivery and assessment of environmental science and related programmes within higher education. The Conference will offer opportunities for sharing and reflecting on best practice, as well as on elements that did not go to plan and considering how a blended learning approach has impacted on broader aspects such as equality, diversity and inclusion, and the sustainability of programmes.

We invite proposals for short oral presentations relating to any of these subject areas:

- 1) Practical work (lab and field) and experiential learning
- 2) Blended approach – balance between online and face to face
- 3) Student engagement and community building
- 4) Employability, placement opportunities and the changing expectations of graduates
- 5) Student research projects (undergraduate, taught postgraduate and postgraduate research students)
- 6) Outreach
- 7) Student Recruitment
- 8) Any other aspect of experience that you would like to share!

Presentations can also touch on any of the below themes:

- | | |
|---------------------------|--|
| A) Best practice | F) Practitioner experience |
| B) Lessons learnt | G) What has worked well and will be taken forward after Covid-19 |
| C) Sustainability | H) Any other aspect |
| D) ED&I | |
| E) Disasters and triumphs | |

Presentations will be around 10 minutes with some time allocated for discussion and Q&A afterwards. Presenters will receive free entry to the conference.
