09/07/98

Dear Sir,

**Special Wastes: A Technical Guidance Note
on their Definition and Classification**

We received the above consultation document on 30th May, 1998.

Regrettably we have been unable to identify within the available time span a suitable experienced member of our technical panel who would be available to prepare a response.

Whilst there is some scope for addition/amendment to the draft document we would observe that it seems to be reasonably comprehensive and informative in its initial state and the layout is clear and logical.

We regret being unable to contribute on this occasion.

Yours sincerely

Dr. R. A. Fuller
Hon. Secretary
